

# BLUE SKY NETWORK SKYROUTER

## TAKE CONTROL OF YOUR GLOBAL TRANSPORTATION FLEET

THE SKY IS

NO LONGER THE LIMIT

GLOBAL

ASSET MANAGEMENT

FLEET SECURITY

INTERNET ACCESS

## TRACK ANY ASSET, ANYTIME, ANYWHERE

Imagine seeing all of your aviation, land mobile, and/or marine assets on one screen and knowing exactly where they are. Imagine being able to set up an unlimited number of user accounts so your entire logistics and operations team, and even your customers, can track and communicate with your assets. Imagine being able to control your entire fleet from the comfort of your own desk. There's no need to imagine. Blue Sky Network's SkyRouter is here and it's ready to track any asset, anytime, anywhere.

## THE POWER OF SKYROUTER

SkyRouter is an entirely unique global Web portal designed and operated by Blue Sky Network to support globally dispersed and critical assets. The SkyRouter portal works seamlessly with Blue Sky Network's tracking and two-way messaging transceivers and is designed to transmit satellite messages to and from assets en route or end users on the ground in the form of GPS position reports, special events, two-way text messages, or telemetric data reports.

Included in our SkyRouter Web portal is a smooth global mapping solution accessible to anyone with an Internet connection. As an added feature, Google Earth's three-dimensional map can also be integrated for live and historic asset tracking.

## THE WORLD'S LEADING WEB PORTAL FOR SATELLITE BASED ASSET MANAGEMENT

Whether you are managing fixed or rotor wing aircraft, marine vessels or land mobile assets, SkyRouter provides unprecedented fleet management tools. From near real-time GPS-based asset tracking to two-way text messaging, your mobile assets are never out of reach. Here are some of the benefits our customers experience using SkyRouter:

- **TRULY GLOBAL COVERAGE:** Monitor and manage your fleet regardless of location – today and wherever your future growth may take you.
- **ACCESS FROM ANYWHERE:** All you need is Internet access to log in and manage all of your remote assets. With unlimited user accounts, you can give access to co-workers, managers, and even your customers.
- **ENHANCE FLEET SECURITY:** Monitor Panic/Mayday alerts directly via SkyRouter and advanced e-mail/SMS messaging.
- **DRAMATICALLY INCREASE FLEET UTILIZATION:** Real-time dispatching and routing using either voice or full two-way text messaging to and from remote assets.
- **SECURE:** SkyRouter is built on a completely secure architecture, with several layers of protection in place to keep your data safe.

"Prior to Blue Sky Network, we had not found a suitable tracking solution that was both economic and versatile enough for our varied international projects. Now we have one reliable and easy solution which also maintains the best access and control of our flight operations."

Brian Mycroft  
Director of Operations  
VIH Helicopters

## SKYROUTER FEATURES & BENEFITS:

### HIGHLIGHTED FEATURES:

- Global Web-based map
- Seamless integration with Google Earth
- Unlimited user accounts for co-workers, managers, and even customers at no extra cost
- Configure and update Blue Sky Network transceivers anywhere in the world
- Complete overview from asset list
- Set up and monitor alert settings
- Set up and manage trip plans
- Receive event notifications
- Send and receive two-way e-mail messages
- Easy placement of private locations such as rigs, heliports and buildings
- Manage account billing, call logs/data usage, and account information
- Near real-time transmissions
- API for integration with third party software

### HIGHLIGHTED BENEFITS:

- **SAFETY:** Using SkyRouter's built-in alerting mechanisms, you will always be notified if there is an emergency or if an asset becomes inactive before it reaches its destination.
- **EFFICIENCY:** Operators can use the built-in trip/flight planning tools to schedule for an entire day and calculate the effect of re-routing and re-scheduling.
- **CUSTOMER RETENTION:** SkyRouter users often give their customers access to track aircraft in SkyRouter, thus improving the customer experience and building loyalty in the long run.
- **TRAINING:** Use the Google Earth interface for asset operator training by reviewing and analyzing driver/pilot/captain behavior.
- **GLOBAL:** Powered by Iridium Satellite, SkyRouter will follow your assets anywhere on the planet.

## SECURITY AT ITS BEST

Users of SkyRouter and Blue Sky Network's transceivers can operate with peace of mind. Our system is completely reliable and secure. SkyRouter's main server is housed in a secure hosted facility and backed up by redundant servers and power sources, allowing its services to operate at near 100% uptime.

## SKYROUTER DATA EXCHANGE

Blue Sky Network offers even more flexibility for asset managers with DataExchange. This tool allows users and 3rd party software vendors to access data from SkyRouter. We integrate satellite messaging from our remote transceivers with a number of different vendors and public agencies today.

## BLUE SKY NETWORK

Founded in 2001, Blue Sky Network is the leading provider of global satellite logistics solutions for two-way linking and managing remote aviation, marine, and land mobile assets. Using SkyRouter, the interactive Web portal with detailed mapping and integration with Google Earth, Blue Sky Network links enterprises to personnel and assets anywhere on Earth over the Iridium Satellite network. Blue Sky Network's exceptional customer service and management team make it the perfect partner for adding true global communication to your transport network.
