

A silhouette of a person wearing a cap and using a mobile device, set against a cloudy sky with a street lamp. The image is overlaid with a complex pattern of white geometric shapes, including circles, squares, and lines, creating a technical or digital aesthetic.

THE MOBILE
REVOLUTION
IS HERE.

XRS

XRS is a compliance powerhouse in the palm of the driver's hand. It operates on your mobile device and its #1 job is to help keep fleets and drivers compliant.

It's all so simple: Buy the XRS application, plug the "XRS Relay" device into your truck's computer, download the application onto the driver's smartphone, rugged handheld or tablet, and access the data immediately - both driver and fleet manager.

The market is ready for mobile.

Almost 90 percent of drivers have mobile devices. Why not use them instead of bulky onboard solutions and hard-wired displays that become obsolete and are expensive to update?

Margins are razor thin. In today's market, it takes every advantage to reduce fleet operating costs and be more competitive. You need seamless, automated reporting of fleet performance indicators.

We're in a whole new world of regulation. CSA scores can grind fleets to a halt before they know it. Sharper, easier monitoring to avoid violations is needed.

XRS makes this happen for fleets of all sizes, using mobile devices.

Every day, you're faced with dozens of operations decisions. Xata can help you make the right ones — every day. To learn more about how XRS will help you gain a competitive edge, visit www.xrscorp.com.

THE NEXT GENERATION OF MOBILE TECHNOLOGY

XRS is a flexible mobile cloud platform. Fleets and drivers use XRS hand-held mobile technology to capture the data for two essential needs: Keep drivers and fleets compliant; and slash costs.

And we know mobile. We've had eight years of success with our first-generation mobile tool — Xata Turnpike — with more than 50,000 mobile subscribers.

How it works: Compliance has become mobile.

XRS is virtually instant. It's truly "plug-and-play." The palm-sized "XRS Relay" device in the cab connects in minutes to your truck's engine. Through Bluetooth, the data is transferred wirelessly to the driver's mobile phone, tablet or rugged handheld. Then the data is uploaded automatically to a web-based application for real time visibility, exception alerts, and fleet analysis. 1, 2 3 — life is easier for the driver, and the information is accurate and complete for the carrier.

The core competence of XRS is compliance. We're here to help you manage FMCSA issues and monitor DVIR to keep drivers safe and compliant, and trucks operating.

INTEGRATION

XRS isn't an island — it's a bridge. XRS runs third-party applications seamlessly with the same driver login. With XRS as the gateway, you've got a powerful integration platform for other parts of your business from dispatch to proof of delivery.

With the Mobile API, it's easy for the driver to manage all applications on one portal on the handheld device. And management will get better-quality information, faster.

Get on top of vehicle and driver safety.

We're in a whole new world of regulation. CSA score problems can grind fleets to a halt. XRS is here to prevent that. Here's how:

- ✓ XRS provides you with the real-time data to substantiate and confirm your CSA status with customers.
- ✓ Because XRS runs on a hand-held device, it is intuitive for your drivers.
- ✓ HOS becomes digital with XRS. No paper forms with accompanying delays and mistakes.
- ✓ Speech alerts tell the driver when HOS limits are being approached, and email alerts help managers stay on top of HOS.
- ✓ DVIR reports are automatic and digital, with better visibility into vehicle problems and 396.11 compliant electronic records keeping.
- ✓ There's real-time transfer of vehicle repair issues to your maintenance office, coupled with digital repair notations to keep records up-to-the-minute.
- ✓ Safety managers benefit from XRS Driver Log Editor to manage log issues by exception.
- ✓ At a trooper stop or weigh station, your smartphone or tablet linked to the truck via XRS serves as a walk-around device to prove compliance. The driver is untethered from the cab.

Take control of vehicle and driver performance.

We've always gone beyond compliance during our 27 years in the trucking industry. XRS is no different because it has built-in fleet optimization and cost-savings power. Here's only a partial list of the performance factors XRS will measure for you to enhance fuel efficiency, fleet utilization and accident prevention, along with compliance:

- Automated fuel tax reporting (Our unique and efficient Print-Sign-Send service is unrivaled in the industry)
- Driver scorecards to manage performance from the bottom up
- Fleet scorecards to manage performance from the top down
- Fuel economy and idle time
- Speed tracking
- Hard braking and high speed braking incidents
- Black Box reporting for accident reconstruction
- Engine fault code reporting
- Stop times
- Utilization patterns
- Real-time mapping of drivers and vehicles with Fleet View Driver availability planning tools
- Driver time clock tracking
- (And the list goes on)

All are available on your configurable reporting dashboard with periodic trend reporting to your specifications.

PRODUCTIVITY (MESSAGING & FORMS)

XRS FORMS: DEVICE-AGNOSTIC DRIVER PRODUCTIVITY

- Safe two-way messaging keeps drivers focused on the road and not on their device
- Message drivers, driver groups or other XRS users
- Forms Messaging to improve dispatch operations
- Forms Designer makes Forms Messaging easy
- Photo capture, signature capture
- Easy API

XRS FORMS USE CASES

- Delivery Workflow
 - Planned Stops
 - Basic Delivery Capture
 - Break/Delay Capture
 - Exceptions (OSD's, Customer Not Available)
 - Fuel Purchase
- Proof of Delivery*
 - Barcoding
 - Photos of Damage
 - Signature Capture
- Other Workflow
 - Breakdown Notifications
 - Customer Surveys/Delivery Feedback
 - Oilfield Ticketing
 - Driver Management
- For Hire
 - Dispatch Integration or Standalone
 - Document Capture (In Cab "Scanning")
 - Maintenance
- Integration Options
 - Via Web Services
 - XRS Data Archival

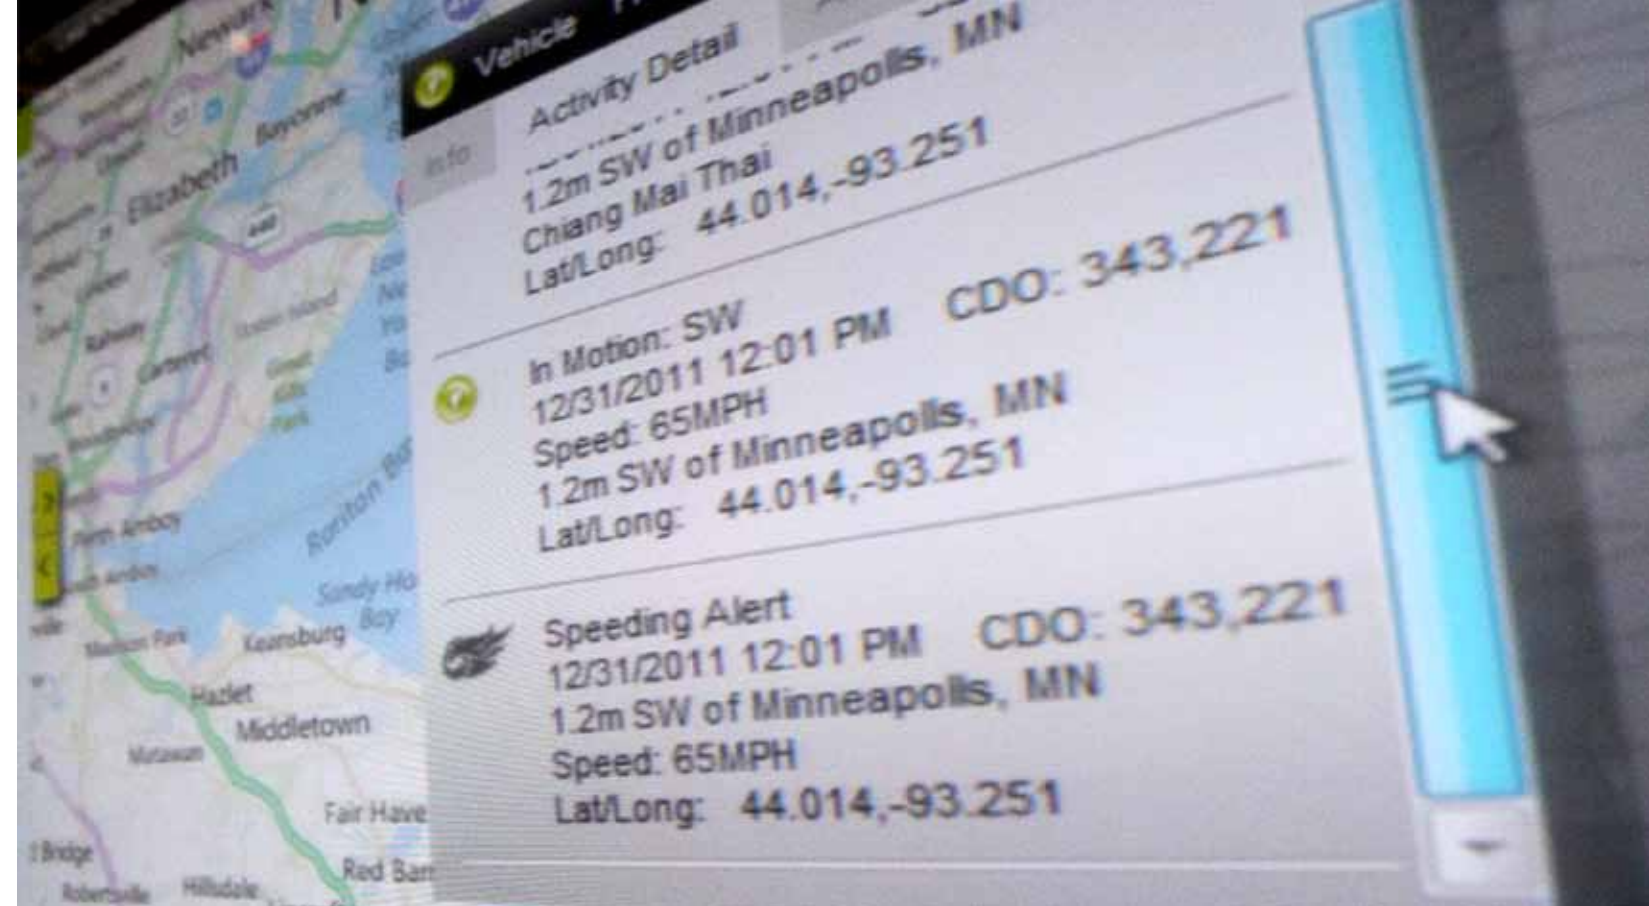

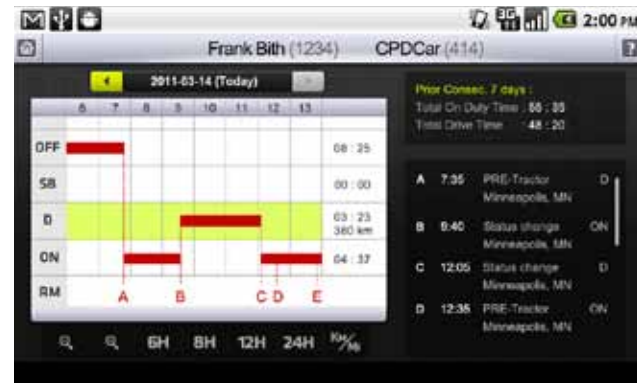

Fast, easy, inexpensive.

- ✓ Installing XRS is a snap, with no truck downtime and no bulky on-board, hard-wired installations.
- ✓ Getting started is as quick as a software download on the hand-held device.
- ✓ There's no up-front investment in hardware: You've got your mobile device; our in-cab XRS Relay is free when you sign up; and the monthly software subscription is a bargain.
- ✓ Many operations are finding XRS pays for itself in a few weeks. The ROI starts almost immediately.
- ✓ The subscription pricing is no-hassle: a 30-day contract cancelable anytime; and no hardware costs. Compare that to the competition!

Lock down your compliance practices with XRS, and improve your fleet performance in the bargain.

Technical information:

- Platform support: Android, Windows Mobile and more to come, on 3G, 4G, LTE, ultra-broadband. Whatever technology is next, XRS will be there.
- Operates in the Amazon Cloud, making it secure and scalable, with mobile access anywhere.
- Works on tablets, smartphones and rugged hand-held devices from all major OEM's.
- Carriers: AT&T, Verizon and Sprint in the U.S., Rogers in Canada.
- Real-time alerts on vehicle and driver safety and compliance can be communicated to multiple individuals in your operation.

Features	Compliance	Performance	Premium	Enterprise
FLEET VIEW Real-time asset tracking using Bing maps	X	X	X	X
TIME CLOCK Time tracking for HOS and non-HOS drivers	X	X	X	X
MESSAGING Integrated two-way messaging	X	X	X	X
HOS Electronic hours of service	X		X	X
DVIR Automated, compliant vehicle inspections	X		X	X
PERFORMANCE Capture and monitor data for fuel efficiency, driver behavior, critical events		X	X	X
FORMS Automate driver workflow and data collection			X	X
IFTA Efficient Print-Sign-Send makes fuel tax reporting easy	O	O	O	X
MOBILE API Integrate other apps with XRS mobile data and workflow	O	O	O	X
CLOUD API Integrate real-time and historical fleet data through simple REST web services	O	O	X	X

*It's time to throw onboard
overboard. The "old days" of
major hardware installations
hard-wired into every vehicle are
over. Conversion to a system using
mobile phones, smart phones or
tablets already in the hands of
drivers is faster, more reliable and
remarkably inexpensive.*

ABOUT XRS

XRS Corporation (formerly Xata Corporation) delivers mobile compliance and fleet management software solutions to the trucking industry, resulting in a previously unattainable level of mobile fleet optimization for its customers.

XRS is leading the trucking industry's migration to mobile devices for collecting and analyzing compliance and management data. It is a low-cost and easy-to-install solution that runs on consumer grade smartphones, tablets and rugged handhelds – devices most often owned by drivers, themselves. XRS is the only company with compliance partnerships with all three of the major mobile platform providers in the trucking industry – AT&T, Sprint and Verizon.

XRS helps drivers and fleets comply with governmental regulations, keeping drivers on the job. XRS makes it easy for fleet managers, dispatchers and drivers to collect, sort, view and analyze data to help reduce costs, increase safety and compliance, and improve customer satisfaction.
